

## CONVEYORIZED TARGET™ SAUCE APPLICATOR SPREADER STATION

Manufactured to work in conjunction with a QTJK Series Applicator, The Quantum Sauce Spreader Station is a machine add on designed spread sauce with large particulates. A nozzle or custom sauce pattern plate is used to deposit sauces that have large particulates that prevent them from running in a standard sauce head. Taking advantage of the intermittent motion of the QTJK Series Applicator, the sauce spreader station is capable of evenly spreading large particulate sauce to your product while maintaining a sauce free border.

### SPECIFICATIONS

**PRODUCT:**

Rigid and supported products

**SAUCE:**

Flowable product with particulate

**PRODUCTION RATE:**

Intermittent motion up to 40, 12" pizzas per minute per lane  
Multiple lane configurations available

**ELECTRICAL:**

240 vac., 3 phase 10 amp circuit 60 Hz.  
Stainless steel control enclosure  
Stainless steel enclosed motor and gearbox

**PNEUMATIC:**

80 PSIG @ 16 SCFM  
Clean dry air.

**CONSTRUCTION:**

Stainless steel construction  
Continuous smooth welds  
Mounts over a flighted stainless steel conveyor chain

**CONTROL:**

Touch screen Human Machine Interface provides user friendly, intuitive operation, including conveyor speed selection, rate indication, system diagnostics, and production data including pizzas made, opportunities missed and production efficiency.
